WHY DO YOU WANT IT?

## What is Tuning and What's so special about it?

Tuning is an upgrade to the software in the vehicle's computer.

Custom software is installed that changes many parameters that control the way the engine operates. With proper tuning, you can increase both power and fuel economy

A comprehensive tool  
for high horsepower  
builds.

With proper tuning,  
you can increase fuel  
economy.

BENEFITS

# What can I Expect from Tuning?

What can I Expect from Tuning?  
Through proper modification, it is possible to greatly increase the power output of the vehicle. While at the same time improving safety and longevity of the engine, drivability, and smoothness.

## 20-35 hp

roughly increase from  
a stage 1 tune.

## 35-50 hp

roughly increase from  
a stage 2 tune.
